

# Creating an Economy in Service to Life: A Blueprint for a Sustainable and Thriving Future

Our current economic system is broken. It is based on the false premise that endless economic growth is possible on a finite planet. This growth-obsessed system has led to a host of problems, including environmental degradation, social inequality, and financial instability.

In her groundbreaking book, *Creating An Economy In Service To Life*, author and economist Hazel Henderson lays out a comprehensive plan for restructuring our economy to prioritize the well-being of both people and the planet.

Henderson argues that we need to move beyond the current paradigm of economic growth and adopt a new economic model that is based on sustainability, equity, and cooperation.

Henderson's book is divided into three parts.

In the first part, Henderson provides a critique of the current economic system. She shows how the growth-obsessed system has led to a host of problems, including environmental degradation, social inequality, and financial instability.

In the second part, Henderson lays out a vision for a new economic model. She argues that we need to move beyond the current paradigm of economic growth and adopt a new economic model that is based on sustainability, equity, and cooperation.

In the third part, Henderson provides a roadmap for how we can transition to a new economic model. She outlines a series of specific policy changes that we can make to create a more sustainable and equitable economy.

*Creating An Economy In Service To Life* is a must-read for anyone who is interested in creating a more sustainable and just world.
