

# Elecopter: The Boy Who Dreamed of Flying

Elecopter is the thrilling and inspirational story of a young boy's dream to fly. Michael Slack was just 12 years old when he built his first helicopter. He had always been fascinated by flying, and he spent hours watching airplanes and helicopters take off and land. One day, he decided to build his own flying machine.

Michael used wood, metal, and other materials to build his helicopter. He worked on it for months, and he finally finished it in the summer of 1959. Michael was so excited to fly his helicopter, but he knew that he needed to test it first. He took it to a nearby field and flew it around for a few minutes. The helicopter flew perfectly, and Michael was overjoyed.

Michael's helicopter was a success, and he flew it for many years. He even took it to air shows and won several awards. Michael's story is an inspiration to anyone who has a dream. It shows that anything is possible if you set your mind to it.
