

# Re Creating The World's Greatest Journey Of Survival

In 1804, Meriwether Lewis and William Clark set out on a journey that would change the course of American history. Their expedition took them from the Missouri River to the Pacific Ocean, and along the way they encountered a vast array of challenges and triumphs. Two hundred years later, a group of young people set out to recreate the Lewis and Clark Expedition. Their goal was to learn about the challenges and triumphs of the original expedition, and about themselves.

The group of young people who recreated the Lewis and Clark Expedition called themselves the "Corps of Discovery II." They were a diverse group of people from all walks of life, but they all shared a love of adventure and a desire to learn more about the history of their country. The Corps of Discovery II set out on their journey in the spring of 2003. They followed the same route that Lewis and Clark had taken, and they encountered many of

the same challenges. They had to deal with extreme weather conditions, difficult terrain, and hostile wildlife. But they also experienced the same sense of wonder and adventure that Lewis and Clark had felt. The Corps of Discovery II completed their journey in the fall of 2006. They had traveled over 8,000 miles and had faced many challenges. But they had also learned a great deal about the Lewis and Clark Expedition and about themselves. They had proven that the spirit of adventure is alive and well in the 21st century.

## **The Challenges of the Lewis and Clark Expedition**

The Lewis and Clark Expedition was one of the most ambitious and dangerous journeys in American history. The expedition faced a number of challenges, including:

- **Extreme weather conditions.** The expedition traveled through a variety of climates, from the hot and humid swamps of the Mississippi River to the cold and snowy mountains of the Rocky Mountains. The explorers had to deal with extreme heat, cold, rain, and snow.
- **Difficult terrain.** The expedition traveled through some of the most rugged terrain in North America. The explorers had to climb over mountains, cross rivers, and navigate through dense forests. The terrain was often treacherous, and the explorers had to be careful not to get lost or injured.
- **Hostile wildlife.** The expedition encountered a variety of wildlife, including bears, wolves, and bison. The animals were often dangerous, and the explorers had to be careful not to be attacked. The explorers also had to deal with insects, which were often a nuisance.

- **Disease.** The expedition was plagued by disease. The explorers suffered from a variety of illnesses, including dysentery, scurvy, and smallpox. Disease was a major cause of death on the expedition, and the explorers had to be careful to avoid getting sick.
- **Food shortages.** The expedition often had to deal with food shortages. The explorers had to hunt for food, but the game was often scarce. The explorers also had to rely on plants for food, but many of the plants were poisonous. Food shortages were a major challenge for the expedition, and the explorers had to be careful not to starve.

## **The Triumphs of the Lewis and Clark Expedition**

Despite the challenges they faced, the Lewis and Clark Expedition was a success. The expedition achieved a number of important goals, including:

- **Exploring the Louisiana Free Download.** The expedition explored the vast Louisiana Free Download, which had been acquired by the United States from France in 1803. The expedition mapped the territory and provided valuable information about its resources. The expedition also helped to establish American sovereignty over the region.
- **Establishing trade relations with Native Americans.** The expedition established trade relations with a number of Native American tribes. The tribes provided the explorers with food, supplies, and information. The expedition also helped to improve relations between the United States and Native Americans.
- **Documenting the flora and fauna of the West.** The expedition documented the flora and fauna of the West. The explorers collected hundreds of specimens of plants and animals. The expedition's

findings helped to expand the knowledge of the West and its natural resources.

- **Inspiring future generations of explorers.** The Lewis and Clark Expedition inspired future generations of explorers. The expedition showed that it was possible to travel across the vast expanse of North America. The expedition also helped to raise awareness of the West and its potential.

## **The Corps Of Discovery II**

The Corps of Discovery II was a group of young people who set out to recreate the Lewis and Clark Expedition. The group was made up of people from all walks of life, but they all shared a love of adventure and a desire to learn more about the history of their country. The Corps of Discovery II set out on their journey in the spring of 2003. They followed the same route that Lewis and Clark had taken, and they encountered many of the same challenges. The Corps of Discovery II completed their journey in the fall of 2006. They had traveled over 8,000 miles and had faced many challenges. But they had also learned a great deal about the Lewis and Clark Expedition and about themselves. They had proven that the spirit of adventure is alive and well in the 21st century.

## **The Legacy Of The Lewis And Clark Expedition**

The Lewis and Clark Expedition was one of the most important events in American history. The expedition helped to shape the course of American history, and its legacy continues to inspire people today. The expedition's achievements are a testament to the human spirit of exploration and adventure. The expedition also helped to raise awareness of the West and its potential. The expedition's findings helped to expand the knowledge of

the West and its natural resources. The expedition also inspired future generations of explorers. The Lewis and Clark Expedition is a reminder that anything is possible if you have the courage to dream it and the determination to achieve it.
